

I am opposed to the LEAPS Project!

- The steel towers will be an eyesore to the residents and tourists of the community.
- The power lines will greatly increase the chance of fires in the Cleveland National Forest.
- The proposed reservoir(s) will sit on and around several earthquake faults.
- The cost and maintenance will fall on the citizens.
- Ferc has disagreed with the treatment for pumped storage.
- CAISO doesn't want to manage the project, therefore LIMA was created.
- Not a renewable power source, does not meet the EPAct 2005 mandate.
- This project is not in the best interest of the citizens of Lake Elsinore.
