

This project would be an environmental disaster to our community.
We moved to Lake Elsinore to enjoy the views and the Lake, the lake doesn't have enough water to make this project successful. The action of moving the water in and out will cost evaporation of some of water.
My family and I enjoy the view of the lake very much, We drive by the lake every day it is relaxing. The reason we purchased a house here in Lake Elsinore and commute to Los Angeles every day it was due to the rural clean feeling we have now and to enjoy the weekend here in our house and surroundings all of this will be changed and we will fight to stop this project.
SAVE OUR TOWN, OUR HEALTH AND OUR FINANCIAL FUTURE, DO NOT ALLOW TO DESTROY OUR MOUNTAINS, HILLS AND LAKE. HELP!!!!!!!!!!!!!!
